

Wanglong Lu

Senior Data Scientist | Applied Multimodal Intelligence

St. John's, NL, Canada | lwlxhl@gmail.com | Website | GitHub | LinkedIn | Google Scholar

Updated October 6, 2026

Research & Professional Profile

Applied multimodal intelligence researcher and Senior Data Scientist at Nasdaq; Ph.D. in Computer Science. Expertise in generative vision, efficient adaptation, financial ML, and cloud-based ML systems.

Professional Experience

Nasdaq

St. John's, NL, Canada

Senior Data Scientist, AI/Analytics

Mar. 2025 – Present

- Integrated an **existing cross-team ML UI/backend prototype** into a **SageMaker workspace**; configured networking/IAM and **PostgreSQL user-state persistence**; deployed **FastAPI on AWS Lambda using Mangum**.
- Designed cross-scale ensemble feature selection that removed **77.2% of input features** while retaining competitive performance on CFML data; presented the algorithm to more than 60 attendees.
- Built **SageMaker Job Submitter** for script/dependency packaging across **Processing, Training, Hyperparameter Tuning, and SageMaker Pipelines**; cut developer job configuration from **7 days to 1 day (about 86% less)**.
- Designed **feature engineering with PyTorch/CUDA-accelerated feature-label AUROC screening**; used **Amazon Bedrock** to assess candidate features' semantic plausibility.
- Developed **PagerDuty RAG assistant v2** on the company's GenAI platform; **now used internally and recognized in a company shout-out**. Retrieves incident context and troubleshooting guidance for on-call engineers.
- Mentored **cheque OCR** research on perceptually aligned quality metrics, culminating in a student presentation; guided **tabular-data generation** leading to a **StDDPM manuscript submission**.
- Mentored **Seeam (work-term student)** on an **input payload checker** from Jun. 2026, and **Daniel (Mitacs student)** on **GNN-based crime-ring detection** from Sep. 2026.

AI Algorithm Intern (two placements)

May 2024 – Jan. 2025

- Proposed **TextDoctor**: structure-pyramid prediction and patch-pyramid diffusion for document/cheque inpainting; **8K inpainting on a 24GB RTX 3090**. Python/PyTorch, AWS/SLURM/CUDA. **First-author manuscript submitted to Engineering Applications of Artificial Intelligence (EAAI)**.
- Evaluated **7 document datasets** without dataset-specific fine-tuning. FUNSD, TextDoctor (GSDM): **55.38% PaddleOCR word accuracy vs. 45.24% DocDiff (+10.14 percentage points)**.
- Designed **PLAID**: patch-level Gaussian discriminant modeling of genuine and forged samples, **without backbone fine-tuning**; evaluated **8 biometric benchmarks and 16 backbones**. **8-shot ResNet-152 AUROC: 99.42% CEDAR, 98.42% GPDS-150**.
- **First-author submission to IEEE Transactions on Information Forensics and Security (TIFS)**; major revision submitted **Apr. 2026**, awaiting second-round decision. Presented both placements: earlier talk about **40–60 attendees**; final talk **39 cross-functional attendees**.

AI Intern – Beaufort Solutions

Jul. 2022 – Nov. 2022

St. John's, NL, Canada

- Led method design of **TEG**, a CLIP-based **few-shot adaptation** approach for personalized photo-book curation; introduced a text-embedding-guided classifier and auxiliary classification loss to improve learning from limited labels.
- Led Theme25 collection pipeline (**35,655 annotated images, 25 themes**); evaluated Theme25, CIFAR100, and ImageNet on AWS/SLURM; published in **Journal of Electronic Imaging (2024)**.

AI Algorithm Intern – Zhongkong Hanlian

Dec. 2017 – Aug. 2018

Hangzhou, China

- Designed **ResNet–DenseNet fusion** for vehicle-logo recognition; built Java annotation tools and a dataset for training and evaluation; **deployed with Caffe for real-time inference at community security gates**.

Education

Ph.D., Computer Science – Memorial University of Newfoundland, Canada	2021–2025
M.Eng., Computer Software and Theory – Wenzhou University, China	2018–2021
B.Eng., Digital Media Technology – Communication University of Zhejiang, China	2014–2018

Selected Research & Engineering Projects

UltraDiffEdit – High-Resolution Generative Editing [Code] TNNLS 2026; first author

- Developed multi-patch encoding, global-local consistency denoising, and progressive sampling to extend pretrained latent diffusion models to real-image editing without fine-tuning.
- Demonstrated **8K editing on one RTX 3090**; achieved **UHRSDEdit (4K–8K) crop-FID 7.45 vs. 18.76 for SDXL+bicubic (60.3% lower)**. Video.
- Built **three benchmarks totaling 1,188 images**: DIV2KEdit, Syn2KEdit, and UHRSDEdit; evaluated pretrained SDXL and ControlNet without fine-tuning.

FACEMUG – Multimodal Local Facial Editing TVCG 2024; first author

- Developed a unified editing framework for text, sketches, semantic maps, color maps, exemplars, and attribute labels, with multimodal feature fusion and self-supervised latent warping.
- Achieved **FFHQ FID 23.16 vs. 52.39 for Unite&Conquer** under sketch/semantic conditioning; received **77.88% preference** in a **52-participant CelebA-HQ study** with sketch/semantic/text guidance. Publication.

AdaMSS – Parameter-Efficient Adaptation [Code] NeurIPS 2025; co-author

- Co-developed adaptive multi-subspace updates; ViT-Large averaged **90.13% vs. LoRA's 85.40% (+4.73 percentage points)** across seven tasks, with **241K vs. 1.57M trainable parameters (15.4%)**.
- LLaMA 2-7B reached **50.80% GSM8K accuracy with 4M trainable parameters** vs. 49.05% with 6,738M for full fine-tuning. Method **integrated into Hugging Face PEFT**.

DocPure – Unified Document Restoration [Code] TCSVT 2026; co-first author

- Co-developed degradation-aware structure extraction and wavelet modulation; tested **one prompt-free model on 12 datasets** for deblurring, denoising, compression artifacts, and deshadowing.
- On TDD deblurring, achieved **32.55 dB PSNR vs. DocRes's 28.34 dB (+4.21 dB)** and **61.27% PaddleOCR word accuracy vs. 55.66% (+5.61 percentage points)**. Benchmarks.

GRIG – Data-Efficient Image Inpainting [Code] CVM 2025; first author

- Designed CNN–Transformer iterative residual refinement and forgery-patch adversarial training for data-efficient inpainting on **10 few-shot datasets with 18–750 training images**.
- Reduced FID by **3.70–26.48% vs. each dataset's next-best baseline at 50–60% masking**; benchmarks span medical, animal, cartoon, and art images. Paper.

Visual Style Prompt Learning [Code] Pattern Recognition 2025; first author

- Developed latent-diffusion style prompts and style-modulated aggregation with **four denoising steps**; achieved **12.3 FPS at 512 × 512 on an RTX 3080 Ti**.
- Achieved **WebPhoto-Test FID 74.25 vs. CodeFormer's 83.17 (10.7% lower)**; best mean rank (3.67) across FID/NIQE on three real-world test sets. Paper.
- On **CelebA-Test**, reduced **FAN landmark NME from 6.08% to 2.43%** and raised **HSEmotion agreement from 79.73% to 86.03%**; reference landmarks and emotion labels are model predictions on clean images.

Local Agentic Code Editor Nasdaq internal prototype; 2026

Exploratory side project: API-driven code editing and local tool orchestration

- Built a working local AI code-editor prototype with **model APIs and agentic routing** across code generation, review and shell-tool execution.
- Implemented an iterative debugging loop that **diagnoses bugs, edits code, applies fixes and uses execution feedback** to determine the next action.

Peer-Reviewed Publications

Tuning-Free Latent Diffusion Models for Ultrahigh-Resolution Image Editing

Dissertation

Generative Models for Semantic Facial Image Editing: Multimodal Approaches

Wanglong Lu

PhD thesis, Memorial University of Newfoundland, 2025

Technical Skills

Programming: Python, PyTorch, SQL, Git, Bash, C++, Java, CUDA, OpenCV.

ML & GenAI: Latent diffusion, GANs, Transformers, multimodal conditioning, vision-language models, PEFT/LoRA, Hugging Face, RAG, feature selection, experimental evaluation.

Infrastructure: FastAPI, Mangum, PostgreSQL; AWS SageMaker, Bedrock, Lambda, S3, Docker, SLURM.

Additional Engineering Project

AI Headshot Generation: Implemented model invocation and deployed the generation application.

Teaching, Mentorship & Talks

- Mentored **12 students** in generative vision, image restoration/recognition, and applied ML research.
- Cheque OCR mentorship identified promising image-quality metrics consistent with human perception and supported text-extraction evaluation; the student completed a research presentation.
- Guided sequential financial-data generation research leading to **StDDPM**, a submitted manuscript with a Research Square preprint; evaluated on **1.06 million Czech banking transactions across 4,500 accounts**.
- Teaching assistant at Memorial: Data Structures & Algorithms (2021); Introduction to Machine Learning (2024).
- Guest lecturer, Bio-Inspired Robotics (ENGI 9986), Memorial University, Feb. 2025: a 150-minute lecture on Deep Generative Models and Applications for 10 graduate students.
- Invited speaker, IEEE Newfoundland and Labrador Section AGM, Mar. 2026: Generative Models for Semantic Image Editing: Multimodal Approaches.
- Research talks for academic/industry audiences; 2026 feature-selection presentation to **60+ attendees**.

Academic Service

Invited reviewer, 2026: IEEE TPAMI, IEEE TMM, IEEE Journal of Biomedical and Health Informatics (JBHI), Pattern Recognition, Applied Soft Computing, Engineering Applications of Artificial Intelligence, Scientific Reports, Neurocomputing, Knowledge-Based Systems, and ECCV.

2025: IEEE TIP, IEEE TMM, Pattern Recognition, Neurocomputing, CAD/Graphics, Advances in Manufacturing, Signal, Image and Video Processing, IEEE SPL, Multimedia Systems, Journal of Machine Learning and Cybernetics.

2024: IEEE TMM, IEEE TCSVT, Knowledge-Based Systems, Journal of Medical Systems, Cluster Computing, Journal of Visual Communication and Image Representation, Displays, The Visual Computer, and ETRA PETMEI.

Granted Patents

Co-inventor on four Chinese invention patents:

- Category-consistent deep network learning for image recognition. ZL 2021 1 0408724.X.
- Deep feature-based convolutional neural network for vehicle-logo recognition. ZL 2020 1 0139043.3.
- GAN-based intelligent segmentation of retinal blood-vessel images. ZL 2019 1 0884346.5.
- Convolutional neural network-based intelligent vehicle-logo detection. ZL 2020 1 0139068.3.

Selected Honors & Awards

- Computer Innovation and Entrepreneurship Award, Wenzhou Computer Federation; first prize, team leader (2024).
- Genesis entrepreneur training program, Memorial University (2024).
- Outstanding Research Award (Ph.D.), Computer Science, Memorial University (2023).
- Mitacs Accelerate Award (2022).
- Outstanding Graduate, Wenzhou University (2020); Outstanding Graduate of Zhejiang Province (2018).
- Chinese Graduate Mathematical Modeling Competition, third prize (2019); Lanqiao Cup C/C++ Programming Competition, second prize (2019); CCPC regional competition, third prize (2019).
